

OBJECTIVE

Driven full-stack Software Engineer with expertise in .NET,.NET CORE, JavaScript, AWS, ReactJs, and MSSQL. Skilled in building scalable, user-focused solutions and passionate about innovation, problem-solving, and delivering high-quality applications.

TECHNICAL SKILLS AND INTERESTS

Front-End: HTML | CSS | JavaScript |ReactJS| Bootstrap | jQuery

Languages: C-sharp | PHP

Developer Tools: Git | GitHub | Bitbucket | SourceTree | Visual Studio | Visual Studio Code

Frameworks: .NET Core | .NET Framework | ASP.NET Core MVC | Entity Framework

Cloud/Databases: Azure | AWS | MySQL | MSSQL

Soft Skills: Problem Solving | Teamwork | Active listener

Areas of Interest: Software Development | Full-Stack Development | Cloud Computing | AI Integration

AI Tools: ChatGPT | Claude | Cursor | Base44 (for code generation, debugging, and development acceleration)

EXPERIENCE

•TKM (via Technoforte)

Dec 2025 - Present

Software Engineer

Bangalore

- Developing and maintaining scalable web applications using ASP.NET Core MVC, Entity Framework, and MSSQL.
- Building and enhancing responsive user interfaces using HTML, CSS, JavaScript, Bootstrap, and jQuery.
- Working on debugging, performance optimization, and feature enhancements to improve application efficiency and reliability.

•Neel-Tech

Feb 2025 - May 2025

Software Engineer

Bangalore

- Developed and enhanced web application features across front-end and back-end using ASP.NET Core MVC and Entity Framework.
- Improved UI responsiveness and usability using HTML, CSS, JavaScript, Bootstrap, and jQuery.
- Optimized and debugged legacy code, improving application performance and maintainability.

•Proton Experts Systems and Solutions

Aug 2023 - Feb 2025

Software Engineer

Bangalore

- Results-driven Software Engineer with expertise in full-stack development, delivering scalable solutions using PHP, Laravel, JavaScript, .NET, ASP.NET, ASP.NET Core, MySQL, MSSQL. Skilled in creating seamless user experiences, integrating APIs, and passionate about emerging technologies and best practices.
- Experience with PHP, JavaScript, .NET Framework, ASP.NET, C-sharp, front-end and back-end development, SQL, MySQL, and API integrations including AutoCAD-based workflows.

PROJECTS

•IKBP — Internal Kanban Printing System

Developed an internal system to manage and track imported parts with QR-based Kanban labeling for production workflows

- Designed and developed features to process part data received from GALC and generate QR-coded Kanban labels for tracking.
- Implemented printing functionality for rack- and tray-level Kanban labels, enabling accurate identification of parts on the production line.
- Built modules to support CKD and PC part categories, ensuring structured handling of different inventory types.
- Improved traceability and reduced manual tracking errors by enabling QR-based scanning workflows across production stages.

•Overflow Management System

Developed a system to track and manage part movement during production line disruptions

- Built functionality to track part movement between Assembly, Overflow, and Sub-assembly using inward and outward operations.
- Implemented workflows to handle line-stop scenarios, ensuring accurate tracking of diverted parts.

- Designed logic for real-time visibility of part status and location, improving coordination during production delays.
- Enhanced system reliability by reducing manual intervention in tracking part flow across multiple stages.

•BTS — Bumper Traceability System

Developed a system to track and monitor bumper movement across production stages using label-based identification

- Implemented functionality to generate and manage labels for front and rear bumpers at the line-side stage.
- Designed workflows to track bumper movement through airwash and confirmation processes, ensuring end-to-end traceability.
- Built logic to associate printed labels with individual bumpers, enabling accurate tracking across multiple production stages.
- Improved visibility of bumper status, reducing manual tracking efforts and minimizing process inconsistencies.

•iCent — International Student Engagement Mobile App

Contributed to developing a multilingual information delivery and engagement platform for international students

- Tools and technologies used: C-sharp, .NET Core, SQL Server, JavaScript, jQuery, Bootstrap
- Implemented and enhanced several key features in the existing Admin Panel including user management, document approvals, and dynamic checklist configurations
- Collaborated with the product team to streamline workflows, fix bugs, and improve system performance across various university-specific modules

•LMS: Learning Management System

Developed a scalable LMS using ASP.NET Core MVC, React.js, Identity, Entity Framework, and SQL Server.

- Tools and technologies: ASP.NET Core MVC, React.js, Identity, Entity Framework, C, SQL Server.
- Implemented role-based authentication using Identity, integrated database operations with Entity Framework, and optimized SQL queries for performance.
- Followed secure coding standards and configured CI/CD pipelines for smooth deployment.

•AI-powered Chatbot on Azure

Built and deployed an AI chatbot using Azure Cognitive Services, ASP.NET Core, and SQL Server.

- Tools and technologies: Azure Language Services, ASP.NET Core, C-sharp, SQL Server, Azure App Service.
- Integrated Azure API keys and Knowledge Base for NLP, handled back-end logic with C-sharp and SQL Server.
- Deployed via Azure App Service with CI/CD integration for continuous delivery and performance monitoring.

EDUCATION

•Sharnbasva University

B.tech , Mechanical

2022

CGPA: 8.2
